## ACCESS REVENUE CONTROL SYSTEM

### ACG: Revolutionizing Parking Systems with ARCS

In 2019, Access Control Group (ACG) launched ARCS, a revolutionary parking system designed and manufactured in a small town in Mississippi, USA. Faced with ongoing challenges from other manufacturers that lacked proper support for the U.S. market, ACG committed to creating the most advanced and reliable Access and Revenue Control Parking System available.

Purpose-built for the U.S. market, ARCS delivers exceptional performance paired with industry-leading benefits. Its innovative design is backed by ACG's dedication to quality, reliability, and customer satisfaction.

We take pride in partnering with a trusted network of dealers across the United States, working collaboratively to provide tailored solutions that meet the unique needs of our customers. At ACG, our commitment is clear: putting our customers first and delivering results that exceed expectations.

**ARCS: Designed and built in the USA, for the USA.**

## **Our Commitment to Training and Support**

At ACG, we understand that comprehensive training and reliable support are critical to the success of any product implementation. That's why we focus on empowering our partners and clients with the knowledge, tools, and resources they need to maximize the potential of our product.

### **Training Approach**

- 1. Customized Training Programs:**
  - We tailor our training sessions to meet the specific needs of your team, whether it's technical, operational, or customer-facing knowledge.
  - Training is delivered through multiple formats, including in-person workshops, virtual sessions, and on-demand resources.
- 2. Hands-On Experience:**
  - Our interactive, hands-on training ensures your team gains practical experience using the product in real-world scenarios.
- 3. Comprehensive Documentation:**
  - Participants receive detailed guides, manuals, and FAQs to reinforce learning and provide quick reference materials for post-training.

---

### **Ongoing Support**

- 1. Dedicated Support Team:**
  - Our support team is available to address questions and challenges, ensuring your team has the confidence to succeed.
- 2. 24/7 Help Desk Access:**
  - Around-the-clock assistance is available via phone, email, or chat for critical issues or troubleshooting.
- 3. Continuous Education:**
  - We offer regular updates, webinars, and refresher courses to keep your team informed of product enhancements and best practices.

---

### **Your Success is Our Priority**

By providing comprehensive training and ongoing support, we aim to build strong, lasting partnerships. We're here to ensure that your team feels confident and fully equipped to achieve their goals with ACG.

## Access Revenue Control Parking System (ARCS)

### Overview

ARCS is a comprehensive and customizable software solution designed to streamline parking operations. Available as both cloud-based and onsite solutions, ARCS empowers users to manage complex permit structures and parking systems from virtually anywhere.

### Key Features

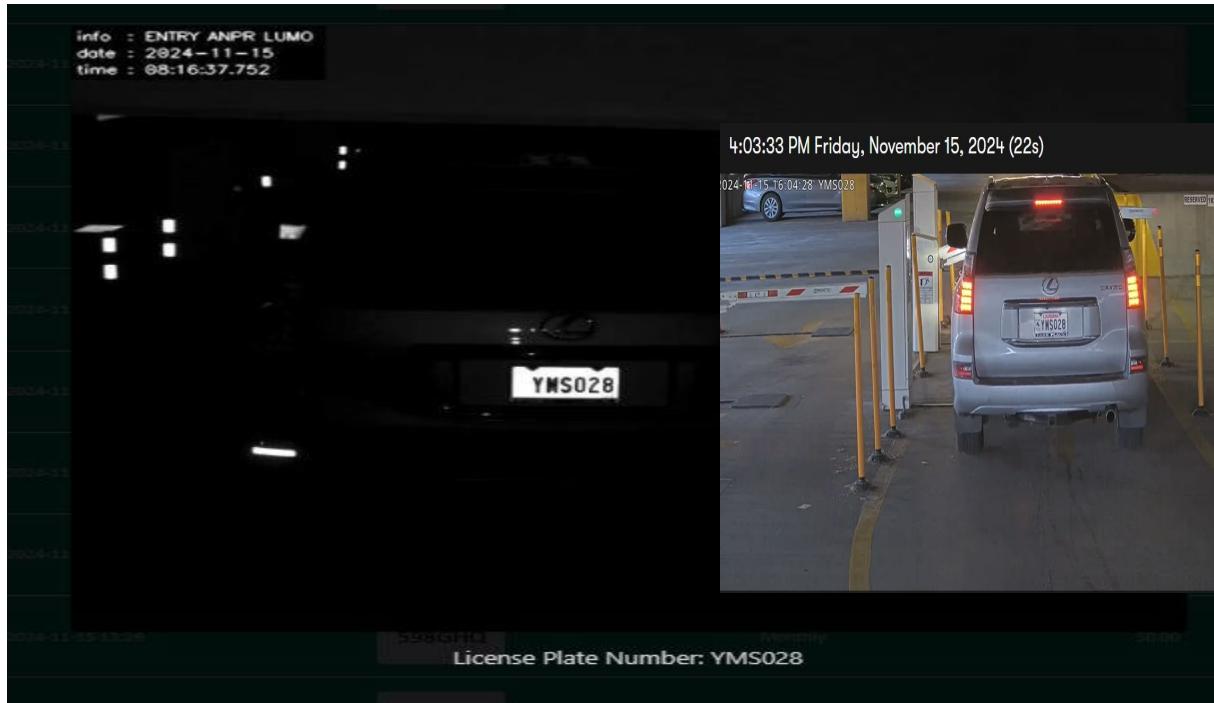

#### Customizable Software

- Tailored to your parking needs with cloud-based or onsite deployment.
- Complete control over parkers with automated issuance or manual administrator options.

#### Digital Parker with License Plate Recognition

- Effortlessly manage monthly and transient parkers with advanced options like license plate recognition (LPR), phone numbers, or QR codes.
- The ARCS system includes integrated access control software, compatible with ELATEC readers and LPR for seamless operation.

## User Features

- Seamlessly manage entry/exit validations, phone numbers, tickets, and access control.
- Enjoy comprehensive control over all aspects of parking operations for a smoother workflow.

## Administrator Features

- Efficiently handle user accounts, and validations.
- Assign companies for validation, organize parking events.
- Track and perform detailed system audits with ease.

**Offers Pay on Entry, Pay on Exit, and Pay on Foot stations for hassle-free payment and smooth exit.**

- Designed with seamless integration of license plate recognition, QR codes, and phone number stations for efficient entry and exit management.

**ARCS Advantage**

Our system delivers an unparalleled range of features and customizable options, offering unmatched flexibility to meet the unique demands of diverse parking management needs. With ARCS, you can tailor every aspect of your parking operations for maximum efficiency and effectiveness.

The image shows a screenshot of the ARCS software interface. At the top, there is a dark header with the ARCS logo and a 'Log In' button. Below the header, there is a 'Device Status' table. The table has columns for 'LotName', 'DeviceName', 'GateController', 'LicensePlate', 'Printer', 'Scanner', 'Credit Card', and 'EPR'. The table lists several devices, each with a green checkmark in every column, indicating they are fully functional. The table is set against a dark background with red and black diagonal stripes.

## **LPR, Access Card, Ticketless, Ticket, QR Code, Access Parking System! ENTRANCE/EXIT/CC PAY STATION**

### **User Interface**

The ARCS Parking Stations are designed to enhance the customer experience by offering intuitive and flexible options for parking access. Customers can easily use tickets, access devices, QR codes, phone numbers, or mobile apps for seamless entry and exit.

Equipped with a high-brightness LCD display, the parking control station ensures effortless navigation for daily visitors. Users can gain access via tickets, phone numbers, access cards, or QR codes with minimal hassle.

The station's larger illuminated screen, combined with integrated intercom support, provides a complete entry and exit solution. This combination ensures effective customer guidance and support, making it ideal for a wide range of facilities.

### **Parking Station Features**

The Parking Station is designed to enhance parker interaction with a prominently placed touchscreen, allowing access via phone number, ticket, access card, or QR code. While retaining the option for ticketed access, it also provides ticketless solutions, digital monthly parking, and frequent parker control.

Key features include:

- Fully integrated **License Plate Recognition (LPR)** for hands-free parking.
- Full **anti-passback control** using soft credentials.
- In-lane credit card processing for streamlined operations, ensuring efficiency for facilities of any size.

Additionally, the system offers **real-time online reporting**, with or without local servers, giving you the flexibility to build a parking solution tailored to your needs.

### **Hardware Features**

Powder coated aluminum cabinet	
IP 65 Sunlight 10.4 in Viewable LCD Touch Screen	
10.4in Touch Screen for ease of use.	
P2PE Encrypted Credit Card Reader with EMV	
Temperature rated enclosed peripheral computer	
TCP/IP interfaces Digital relay control with Heating/Ventilation	

### **Technical Features**

<b>Temperature: Standard:</b> -20°C - +70°C	
<b>Power:</b> 115 and 230 VAC +/-10%, 50/60 Hz	
<b>Load:</b> 780 VA (at -20°C)	
<b>Weight:</b> approx. 113 lb.	
<b>Dimensions:</b> W 13" H 57.5" D 12"	
For wider temperature ranges, we can implement specialized hardware tailored to meet environmental requirements.
